

NEW MONROVIA EXCLUSIVE PACHYSANDRA

WINDCLIFF PACHYSANDRA *Pachysandra axillaris* 'Windcliff'

Collected by Dan Hinkley on LongShou Shan in Sichuan Province in the summer of 2006, this rarely encountered species of Pachysandra offers distinctive evergreen foliage and noticeably fragrant white flowers in early spring, repeating again in autumn. An ideal and unique groundcover, just four to six inches high, for shade or sun. A fantastic addition to Monrovia's Dan Hinkley Collection.

CARE

Needs regular watering - weekly, or more often in extreme heat

Full to partial shade

ZONE : 6 - 9
