

Purple Haze Giant Honey Bush

Purple Haze Giant Honey Bush *Melianthus major* 'Purple Haze'

An exceptional compact form of the Honey Bush from South Africa, with seasonal steely blue foliage with purple highlights, held along tidy stems to two and two and one-half feet tall. Erect burgundy red, nectar-rich bird-attracting flowers appear in late winter to early spring in mild regions. A wonderful container plant in colder regions.

CARE

Water regularly; do not over water

Full sun
